

AMERICAN CIRCUITS

Design Control

Process Owner:
Max Johnson

Rev Level:
(A)

Effective Date:
04/3/18

Receive Design request from customer.

Program Manager discusses the request with the customer to determine understanding and feasibility.

Request:

- Hi resolution pictures
- Sample
- Any documentation that would be helpful in evaluation

Note:
American Circuits does not develop new products, or do any original design in-house. Only reverse engineering and layout of existing designs. All design suitability, operational parameters, and regulatory responsibility rests with the customer.

Refer customer to independent consultant or engineer for complete Design and/or Layout.

Engineering and Management evaluates request.

Categorize request.

Reverse Engineer

Engineering evaluates parts, materials and processes.

Decline project

No

Can we do it?

Yes

Gather material and labor costs, prepare quote and send to customer.
